Dear Mr. Henderson:

Re: Crystal Peak Minerals Corporation Reclamation Proposal/Memorandum of Understanding, M/027/008, Millard County, Utah

The Division recently reviewed Crystal Peak Minerals Corporation's (CPMC) June 7, 1993, proposal for reclamation of the Sevier Dry Lake Project. The proposal outlines decommissioning and reclamation discussions held with the operator, during our June 3, 1993 field inspection of the property.

We are in concurrence with the information as outlined in the proposal. However, we would like to know the specifics of the proposed seed mixture(s), any soil amendments, the topsoiling application rate (if applicable), and any soil manipulation (ripping, scarifying), to be used on the disturbed sites. Also, will the reclamation treatments vary from one disturbed area to another?

Upon examination of CPMC's approved permit application, we were unable to find sufficiently detailed information describing how each disturbed area would be reclaimed. If you have any supplemental information relating to this concern, please provide us with a copy. The specific reclamation procedure(s) for seeding, soil amending, etc., may be something that the operator still needs to provide. If need be, the Division is willing to coordinate with the BLM and CPMC in developing prescriptive reclamation methods for the disturbed areas.

It is our understanding that CPMC has recently contacted the state BLM office requesting a minor delay in the latest proposed reclamation schedule. They may have another party interested in acquiring the properties. This Division will accept whatever timeframe extension the BLM determines is suitable. Please

0002

advise us when you have reached a decision in this regard. We request that you include our concerns as part of your response to CPMC's June 7th proposal. Thank you for your cooperation and assistance in this regard.

Sincerely,

D. Wayne Hedberg
Permit Supervisor
Minerals Regulatory Program
